

Block for Flood Quilt

1. Sew together a nine-patch block, using 5" squares. Use repeat fabric for squares 2, 4, 6, 8 as these become the sashing squares. Press towards sashing. Block should measure 14" at this stage. Trim if necessary.

2. Cut through the sashing and centre squares evenly in both directions, 7" from outside edge.

3. Re-arrange these smaller units as per diagram or play around with your own layout.

4. Sew the four units into a complete block measuring 13 1/2".
